# The new Insio.

**Custom-made, unnoticeable,  
effortless.**

Tailor-made for the anatomy of your ear and your hearing loss, Insio™ is almost unnoticeable and, thanks to the touchControl App™, extremely discreet. And despite its tiny size, it's packed with functionality that delivers effortless hearing across the entire Insio family.

## Enjoy life's true sound.

Whether it's an open-plan office, a crowded store or a busy restaurant, wherever there's a high level of ambient noise, holding a conversation requires concentration and effort. Straining to hear voices in these situations is tiring - a fact that even people with normal hearing are familiar with.

The new Inzio from Signia helps relieve this. Its advanced SpeechMaster function continuously monitors what you are listening to and singles out the dominant speaker to reduce unwanted voices and background noise. You hear what you want but not the rest. As a result, hearing becomes effortless and less tiring than normal hearing. All day long. In every situation.

## A day with the team. And Insio.

### A surprise encounter.

Standing on the platform on your way to the office with all the hubbub of a railway station, a stranger asks for directions. As a train passes by noisily, Insio ensures you don't miss a word. Its intelligent automatic **SpeechMaster** function elevates your conversation partner above other voices while also engaging **narrow directionality** and **noise reduction** to reduce the background sounds and other voices that you are not focusing your attention on – making it easy for you to understand what matters.

### Lunch with gusto.

You grab a quick lunch with colleagues at a street café. As the conversation picks up, so does the wind. With Insio, catching every word is a breeze. Its automatic **SpeechMaster** function engages **eWindScreen™ binaural** to reduce the wind noise, focusing on the direction of the voices you're listening to.

## Open plan discord.

Back in the office, business is brisk but it's a cacophony of phones ringing and people talking. When someone asks for your opinion on a report, Signia Insio manages it superbly. Its automatic **SpeechMaster** function elevates the speaker's voice above others while activating **noise reduction** to tackle the background sounds. Later, at a welcome reception in the foyer, the announcer's voice echoes around the room. Insio's **EchoShield** program reduces the reverberation for better sound quality and greater listening comfort.

## Tinnitus? Relief is at hand.

With its unique range of built-in **tinnitus therapies**, Insio provides welcome relief for tinnitus sufferers. Ask your Hearing Care Professional which settings are best for you.

## Music fidelity you'll really appreciate.

Insio's **HD Music** program delivers outstanding sound quality specially created to let you fully enjoy music. Whether you're enjoying your favorite music at a concert, listening at home on your own HiFi system, or even on stage performing music yourself, HD Music offers an optimized and superb listening experience.

## Extra touches for greater convenience.

### A call for celebration.

With Signia Insio, phone calls are a snap. As soon as the phone is held to your ear, its **TwinPhone** feature transmits the caller's voice to both ears for better understanding. Or connect Insio to your Bluetooth-enabled phone via **easyTek™** for hands-free calling and music streaming, and conveniently control it via the **easyTek App™\***.
